

Q1. Create an external table in the default database on data orders which has order id, customer id and order date.

```
CREATE EXTERNAL TABLE default.orders (  
  order_id INT,  
  customer_id INT,  
  order_date TIMESTAMP  
)  
ROW FORMAT DELIMITED  
FIELDS TERMINATED BY ','
```

Q2. Create a Hive or Impala table on data in the training materials 'base_stations.tsvt' . (Hint: Load the data directly on the table)

```
CREATE EXTERNAL TABLE default.base_stations (  
  
  station_num INT,  
  
  zipcode string,  
  
  city string,  
  
  state string,  
  
  latitude float,  
  
  longitude float  
)  
ROW FORMAT DELIMITED  
FIELDS TERMINATED BY '\t'  
LOCATION '/user/training/data'
```

Q3. Using Sqoop import the suppliers table directly in hive metastore.

```
sqoop import --connect jdbc:mysql://localhost/loudacre --username training --password training  
--table customerservicerep --hive-import
```

Q4. Use Sqoop to import only first_name , last_name , and city from table accounts in AVRO format on HDFS. Create an external Hive/Impala table on it.

```
sqoop import --connect jdbc:mysql://localhost/loudacre --username training --password training  
--table accounts --columns "first_name,last_name,city" --as-avrodatafile
```

```
CREATE EXTERNAL TABLE accounts_avro (  
  
  first_name STRING,  
  
  last_name STRING,  
  
  city STRING
```

)

STORED AS AVRO

LOCATION '/user/training/accounts_avro'

TBLPROPERTIES ('avro.schema.url'='/user/training/accounts.avsc');

Q5. Use Visualizations on basestations table in Mysql . Save the results in CSV or XLS format.

file called “query_result_exercise_5.csv”

Q6. Create a table directly from the metastore.

The screenshot shows the Hue Metastore Manager interface. The top navigation bar includes 'HUE', a home icon, and dropdown menus for 'Query Editors', 'Data Browsers', and 'Workflows'. The main header is 'Metastore Manager'. On the left, a sidebar shows a tree view with 'SQL' selected, followed by 'default' and a list of tables: 'accountdevice', 'dataset', 'device', and 'orders'. The main content area is titled 'Databases > default > orders'. Below this, there's a link for 'orders table'. The 'Overview' tab is active, showing 'PROPERTIES' and 'STATS'. The 'PROPERTIES' section lists: 'Table' (training), 'Mon Aug 03 05:27:03 PDT 2026', and 'text' (Not compressed). The 'STATS' section has a 'Location' link. Below this is a 'COLUMNS (3)' table:

	Name	Type	Comment
1	order_id	int	Add a comment...
2	customer_id	int	Add a comment...
3	order_date	timestamp	Add a comment...
